

Remarks

This amendment is made to conform the application with the provisions of 37 CFR §§1.821 through 1.825. A replacement Sequence Listing is being submitted in order to correct inadvertent typographical errors in the Sequence Listing on paper as originally filed. The computer readable copy furnished herewith contains the same information as the paper copy of the Sequence Listing and no new material is being added by this submission.

Applicants respectfully assert that the replacement Sequence Listing attached herewith is being submitted in order to correct obvious typographical errors at pages 1 and 74 of the original Sequence Listing. Specifically, on page 1 of the Sequence Listing, the correct number of sequence identifier numbers (at numeric identifier <160>) is "42" (and not "96" as indicated on the original Sequence Listing). In addition, on page 74 of the Sequence Listing, the correct abbreviation for the amino acid tyrosine at position 333 is "Tyr" (rather than "Tys"). Applicants respectfully assert that these are obvious typographical errors in the Sequence Listing.

Entry of the replacement Sequence Listing provided herewith in computer readable format and on paper is respectfully requested.

The Commissioner is hereby authorized to charge any fees which may be required to Deposit Account No. 19-0065.

Respectfully submitted,

Doran R. Pace
